

QUARTERLY INTELLIGENCE BRIEFING · APRIL-JUNE 2026

Top-Heavy

On paper, French tech is rebounding. In the second quarter of 2026, startups raised **€2.09 billion** — **up 16% on a year ago**, with four rounds above €100 million against just one in Q2 2025. After a lean 2025, the headline finally points up.

It took one company to make it happen. Alan, the Paris health-insurance unicorn, raised **€480 million in June** — nearly a quarter of everything raised in the entire quarter. Take that single deal out, and French tech funding didn't rise at all. It *fell* about 11%.

That gap — between an encouraging headline and a market that's actually thinning beneath it — is the story of Q2 2026. It wasn't even 2026's strongest quarter: Q1 raised 23% more. Fewer deals, bigger checks, and *a five-year narrowing that this quarter throws into sharp relief*.

MONTHLY RHYTHM

June Did the Heavy Lifting

April opened weak — €305M, roughly half of April 2025. Then June carried the quarter: €1.30 billion, 62% of the total, as Alan, Morpho Labs and Bionyra Pharma all landed in the same four weeks.

FUNDING BY MONTH (€M)

DEALS BY MONTH

The Sequential Read

Q1 and Q2 posted *identical* deal counts — 139 each — yet Q2 raised 23% less. The difference is one quarter having AMI's €890M round and the other having Alan's €480M. Even setting both mega-deals aside, Q2 was still down ~12% on Q1. And yet the median round *rose*, from €4.6M to €5.0M — the middle of the market kept getting bigger even as the top thinned.

The 15 Largest Rounds of Q2 2026

#	COMPANY	AMOUNT	ROUND	MONTH	CITY	SECTORS
1	Alan	€480M	Growth	June	Paris	FINTECH HEALTHTECH
2	Morpho Labs	€151M	Growth	June	Paris	FINTECH CRYPTO

The Alan Asterisk

Alan’s €480M round — from Index Ventures, Prosus, Dara Holdings and Teachers’ Venture Growth — is **22.9% of the entire quarter’s disclosed total**, the highest single-deal share in six years. Strip it out and Q2 funding *fell* ~11% year-on-year. Every number that follows should be read twice: with the outlier, and without it. Note too that two of the top four rounds (Bionyra, Quobly) are Series A — unusually large for the stage, another sign of top-heavy capital.

The Boom Hasn't Come Back

At €2.09B, Q2 2026 is 54% below the Q2 2022 peak (€4.58B). Deal count has fallen every year since — 315 down to 139 — even as the median check has more than doubled to a six-year high of €5.0M. This isn't a return to the boom; it's a market that has been quietly restructuring for four years.

Q2 TOTAL RAISED BY YEAR, 2021-26 (€M)

Q2 DEAL COUNT BY YEAR, 2021-26

The Recurring Giant

Every Q2 has one defining round — Contentsquare (2021), EcoVadis (2022), Ynsect (2023), Mistral AI (2024), Knave (2025), now Alan. What changed in 2026 isn't that there's a giant; it's how much the quarter *leans* on it. Alan is 22.9% of the quarter — against Mistral's 20.3% in 2024 and just 5.5% for Knave in 2025.

Halfway to a Comeback – With an Asterisk

By June, 2026 had raised €4.83 billion — already 61% of *all* of 2025, and up 46% on the first half of 2025. On any reasonable run-rate (~€9.3–9.7B), 2026 clears both 2025 and 2024 to become the strongest year since the 2022 peak.

H1 DEAL COUNT

278

-19% vs H1 2025 (343) · fewest in six years

Flat Underneath

The rebound is two deals. AMI (€890M, Q1) and Alan (€480M, Q2) are €1,370M — 28% of H1 2026 and about **91% of the entire year-on-year gain** over H1 2025. Strip both out and H1 2026 (€3.46B) is only ~4% ahead of H1 2025 — essentially flat, on the fewest H1 deals in the six-year series. Bigger headline, same thin base.

The Money Left AI for Medicine

After two years as French tech's growth engine, AI funding more than halved year-on-year (€513M → €234M) and deal count fell 42%. The capital surfaced instead in health & biotech and in deeptech. (FinTech's €653M is almost entirely Alan and Morpho — strip them and “real” fintech is ~€22M.)

The AI Cross-Check

Over the full half-year, AI *looks* up 80% — but that's entirely AMI's €890M Q1 round. Ex-AMI, AI is down at both the quarter and half-year level; the wave crested in Q2 2024 (€804M) and has receded two years running. What's genuinely rising, with no single deal doing the work, is **HealthTech — up 109% over H1**. The euros rotated from models to medicine.

STAGE STRUCTURE

Fewer Doors In

Seed and pre-seed rounds fell from 91 to 57 deals year-on-year — and from a Q2 2022 peak of 196 to just 71, a 64% collapse in early-stage deal-making. Meanwhile Series A checks grew 80% and Growth is near a six-year high. The top is swelling as the base thins.

STAGE COMPARISON (VS Q2 2025)

Growth	€992M
27 deals · +53% YoY · Alan, Morpho, LegalPlace lead	
Series A	€673M
29 deals · +80% YoY · Bionyra €140M, Quobly €115M	
Seed	€202M
57 deals · -31% YoY · down from 91 deals	
Series B	€151M
6 deals · -47% YoY · Dust, Pivot	
Pre-Seed	€30M
14 deals · +36% YoY · formation still active	

The Pipeline Problem

The funnel that feeds tomorrow's Series A and B is contracting fast. Late-stage is near a six-year high (Growth €992M); the base that should refill it is at a six-year low (71 seed/pre-seed rounds, down from 196 in 2022). That's what "top-heavy" means structurally, not just rhetorically — and it is the single most important trend in the dataset.

Paris Reclaims the Center – and Grenoble Arrives

Paris took 72% of value (up from 59%), lifted by Alan; regional funding fell 20% in absolute terms. But Grenoble stands out — €238M across five deeptech, quantum and medtech deals, second only to Paris this quarter.

PARIS VS. REGIONS (SHARE OF VALUE)

TOP CITIES BY FUNDING (€M)

REGIONAL SPOTLIGHTS

Grenoble

€238M

5 deals. Quobly (€115M), UROMEMS (€55M) and Mantle8 (€31M) anchor a genuine deeptech, quantum and medtech cluster — the region’s standout.

Cugnaux

€50M

AURA AERO’s €50M Series B for regional electric aircraft keeps the Toulouse-area aerospace corridor on the map.

Romainville

€50M

Alta Ares’s €50M Series A adds to the Greater-Paris biotech belt just outside the capital’s city limits.

THE UNDERLYING TREND

With & Without Alan: What's the Real Picture?

Alan's €480M growth round dominates Q2's headline numbers. Strip it out and the entire year-on-year *gain* disappears — the underlying market didn't grow at all. This is the single most important comparison in the report.

THE NUMBERS WITHOUT ALAN

TOTAL FUNDING (EX-ALAN)

€1.61B

-10.8% vs Q2 2025

AVERAGE ROUND (EX-ALAN)

€12.5M

vs €16.5M with Alan

ALAN AS SHARE OF QUARTER

22.9%

highest single-deal share in six years

The Entire Gain Was One Deal

French tech's "+16% year-on-year" headline rests entirely on Alan. Without it, funding *fell* ~11% against Q2 2025. That is the report's central sentence: the record quarter and the shrinking market are the same quarter, viewed with and without a single round.

This isn't a market in free-fall — the median round rose and late-stage capital is plentiful. But it is a market that has stopped widening. Fewer companies are raising, and the ones that do increasingly sit at the top of the stack. The concern is the base: a 64% fall in early-stage deals since 2022 is what makes "top-heavy" a structural description, not a one-quarter mood.

JUN 29

Alan €480M closes the quarter

16 deals, €748.5M — the outlier lands

The State Is the Floor

As private money pulled back from the early stage, public capital held the line. Bpifrance touched 22 of the quarter's 139 deals — more than four times any private fund — and is disproportionately present in exactly the seed rounds that thinned.

Bpifrance

22 deals · 16% of the quarter

The public backbone. Present across seed and growth alike, and the most-cited investor in our own coverage — 33 of 86 Q2 articles.

Kima · daphni

5 deals each

The most active *private* seed funds, alongside Y Combinator (4) and Blast Club (4) — still writing early cheques where the base thinned.

Lauxera

€520M healthtech fund

An oversubscribed second close on a pointed thesis: Europe invents world-class healthtech, but America still controls the scale-up game.

Key Ecosystem Data Points from Q2

€480M — Alan's round, 22.9% of the quarter, the highest single-deal share in six years

4 rounds ≥ €100M vs just one (Knave) a year ago

-64% — fall in seed/pre-seed deal count since the Q2 2022 peak

€238M across five deals makes Grenoble the region's No. 2 hub

Health cluster +57% YoY — the quarter's genuine, broad-based winner

AI -54% YoY in value, -42% in deals — the engine cooled

Can the Base Refill? What We're Watching in H2

Does the Deal Count Stop Falling?

The single metric that decides whether the thinning is cyclical or structural. It has dropped every Q2 since 2022.

Is Alan a One-Off or a Signal?

Watch whether more €300M+ growth rounds follow — late-stage may be genuinely reopening at home.

Where Does AI Settle?

After the AMI and Mistral spikes, find AI's real, ex-mega-deal baseline. It has fallen two years running.

Health & Biotech Follow-Through

Does Bionyra's €140M A-round mark a durable pipeline, or a spike? The cluster is the quarter's real winner.

Grenoble's Second Act

Can the quantum/deeptech cluster produce a second breakout quarter, or was Q2 a Quobly-driven one-off?

The Full-Year Number

Will 2026 clear €9B — its best since 2022 — and how much of that will be a handful of giants?
